

MAHANYASA KEESARA

Student

➤ PROFILE

I am a highly skilled and innovative Mechatronics Engineer with a passion for integrating mechanical, electrical, and computer engineering principles to develop cutting-edge systems and technologies. With a solid background in engineering and a keen problem-solving mindset, I excel in designing, prototyping, and optimizing complex mechatronic systems. I am a skilled and dynamic Computer Science Engineer with a deep understanding of computer systems, programming languages, and software development. With a strong academic background and practical experience.

➤ CERTIFICATIONS

- Lema Labs IOT Training under IIT Madras
- Top Engineer Training Under Anna University

➤ COMPETITIONS

- LED A TEAM OF 4 TO ISA CUMMINS HOSTED BY CUMMINS COLLEGE OF ENGINEERING, PUNE AUTOMATHON 2022 AND CLEARED TILL ROUND 2.
- COORDINATED WITH MULTIPLE STUDENTS FROM VARIOUS DOMAINS TO MAKE A PRODUCT WITHIN 2 DAYS FOR THE INTERNAL CLUB HACKATHON OF THINKDIGITAL SRM.
- RECEIVED HIGH COMMENDATION IN SIMULATING THE HISTORIC SECURITY COUNCIL AS A PARTICIPANT IN DELEGATUS E-MUN 2.0.

➤ PROJECTS

- Jee Rank Website
With competitive exams getting difficult every year. Each student has the right to know their rank. The jee rank website is an effort to help students know an estimate of their rank. This technique can help students prepare well for the next session of the Jee Mains exam and score better in their upcoming exams.

EDUCATION

- **SRM UNIVERSITY**

B.Tech, Mechatronics
Engineering
2020-2024

- **SRI CHAITANYA
JUNIOR COLLEGE,
PUNE**

11th and 12th 2018-2020

- **THE BISHOP'S SCHOOL,
PUNE**

Schooling 2005-2018

LANGUAGE KNOW

- English
- Hindi
- Marathi
- Telugu

ACHIEVEMENTS

- IoT Domain Lead of
Think Digital Club
(May 2022 - October 2022)
- Tech Organiser of
Think Digital Club
(October 2022 - Till now)

HOBBIES

- Readings Frictional Books
- Coding
- Cycling

- **Pay Roll Distribution Website**
With the count of industries
automating and increasing every day, a
payroll distribution system will help
Companies pay their employees with
This project is intended to be an open-
source project for many small
industries or companies that cannot
afford to develop their payroll.
[Github Link](#)
- **Lone Wolf Chat Bot**
An AI chatbot for Android apps uses
natural language processing to
communicate with users, provide
personalized experiences, and offer
customer support.
[Github Link](#)
- **Blogging Website**
To learn to make a website was my
dream when being an early teenager,
the same from around 2015 to 2017.
This initiative got me started on coding
and deploying my projects onto github
and many other platforms.
[Github Link](#)
- **Roverz App**
With tourism being a booming industry,
we need to look out and develop the
less populated and unpopular places
which have a good chance of hearing.
This technique can reduce the burden
on the more populated areas of
tourism.
[Github Link](#)
- **Exact Stock News App**
With the world being attracted towards
the internet and as much as 50% of the
world has joined the internet. The
stock market depends on the world
news a lot and we are trying to simplify
it related to the stock market news.

- Attendance Monitoring System
Using RFID ID Cards we made a RFID based attendance monitoring system and linked it to an algorithm of Data Analysis to understand every members and teams analysis.
 - Home Automation Project
I have used relays to switch on and off lights with an external app and the switch board and made it like an extra add on switch board in which one has to pick the switch socket and regulator and so on we made the same kind 4 switch 2 switch 8 switch and 1 switch boxes are present
 - Agriculture Integrated Farming Project
I have used relays to switch on and off lights with an external app and the switch board and made it like an extra add on switch board in which one has to pick the switch socket and regulator and so on we made the same kind 4 switch 2 switch 8 switch and 1 switch boxes are present.
- Patent and Whitepaper are still pending**
